Re: Revised Section 6 of RI Report
Olin Chemicals/McIntosh Plant Site
McIntosh, Alabama

: r Mr. Lucas:

etter of December 14, 1993. Olin responded to part of your letter of December
'93, which conveyed EPA's comments on the Final Remedial Investigation (RI
rt submitted by Olin on July 30, 1993. This letter, with its attachment and
osures, completes Olin's response. Attachment 1 provides a response to each
PA's comments in Appendix A of the December 6 letter. These response·
ribe how Section 6 of the RI report was revised in accordance with EPA's
ments.

r letter directed Olin to submit only a revised Section 6, Baseline Risk
ssment, and appropriate appendices. You and I agreed in telephone
ersations on December 10 and 20 that changes in Section 6 needed to be
porated into the Executive Summary and Section 7 of the RI report.
ordingly, the enclosures to this letter include five unbound copies of the
owing: a revised Table of Contents and Executive Summary; Section 6 as revised
ccordance with EPA's comments; Section 7 as revised; and Appendix N of
me II of the RI report as revised. The enclosures consist of all pages between
rt tabs to facilitate updating the RI report. Remove all pages behind the
owing report tabs: Table of Contents, Section 6, Section 7, and Appendix N.
rt the enclosed replacement pages for each of these tab sections.

reiterates its strong belief that the future on-site residential scenario will never
r. Olin agreed to include this scenario to provide information to risk managers
t the range of risks that could occur if the site were ever allowed to become
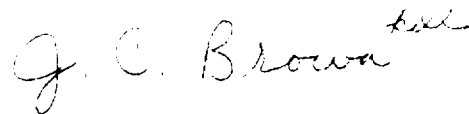

dential. Olin does not believe remedial decisions should be based on this ario because it will never happen.

...se let me know if you have any questions.

Sincerely,

OLIN CORPORATION
